Report On

“Campus Recruitment System”

Under the subject

‘Capstone Project- Execution & Report Writing’ [22058]

Submitted by

Sr. No	Enrollment No	Name of the student
1	1911880168	Sneha Gatlewar
2	1811880061	Deepak Dahiwale
3	1811880071	Shubham Bawankar
4	1811880060	Shubham Kumbhare

Under the guidance of

Ms. Fadanwis ma’am

Department of Computer Technology

Dharampeth Polytechnic, Nagpur

Maharashtra State Board of Technical Education

Certificate

This is to certify that,

Sr. No	Enrollment No	Name of the student
1	1911880168	Sneha Gatlewar
2	1811880061	Deepak Dahiwale
3	1811880071	Shubham Bawankar
4	1811880060	Shubham Kumbhare

From **Dharampeth Polytechnic, Nagpur** have completed **Semester V Project Report** having title **Campus Recruitment System** in a group consisting of **4** persons under the guidance of **Ms. Fadanwis Ma'am.**

Place: **Nagpur**

Date:

Guide

Ms. Fadanwis Ma'am.

Head of Department

Ms. Fadanwis Ma'am

Seal of the Institute

Acknowledgement

We take it is an opportunity to thank all those who have directly and indirectly inspired, directed and assisted us towards successful completion of this project report.

We express our sincere thanks to the Head of Department Ms. Fadanwis Ma'am for having us allowed to submit this report as part of our academics learning.

We express our sincere thanks to Ms. Fadanwis Ma'am sir in Computer Engineering Department of Computer Engineering , Dharampeth Polytechnic, Nagpur for encouragement throughout the project report and guideline in designing and working out this project.

We are also grateful to team of project named as "**Campus Recruitment System"** for their highly encouraging and co-operative attitude. We express our sense of gratitude towards our friend and parents for their constant moral support during project report.

Place: Dharampeth polytechnic, Nagpur
Date: 25/06/2021

Yours Sincerely,
Sneha Gatlewar
Deepak Dahiwale
Shubham Kumbhare
Shubham Bawankar

Abstract

The need and importance of Information Technology (IT) has been established in all walks of professions and everyone has experienced that one of the most important components of IT is computer. The role of computer and digital equipment is well accepted in decision making, automation of work and in communication. Therefore, it has become essential for everyone irrespective of their core discipline to acquire basic knowledge and skills to develop insight not only into its potential and application but also to utilize and manage basic IT infrastructure and resources effectively. Through this Capstone Project Planning, we have acquired knowledge and skills related to developing a software project by following various different phases.

Our project "Campus Recruitment System" is website developed for the company to facilitate the ease of application for internship or recruitment in the company. This website acts as a time saving means for both the company and the applicants in this large public sector undertaking.

The following report explains the solutions to problem identified by us which is campus recruitment system. The report explains the importance of why there was need to develop this project. This report also consists of the schedule of the development of the project. Various UML diagrams such as Data Flow Diagram, Use- Case Diagram, Activity Diagram and Class Diagram are used to better understand the structure of the project. The report will help in coding for development of actual system.

Chapter 1: Introduction

1.1 Introduction and objective:

The need and importance of Information Technology (IT) has been established in all walks of professions and everyone has experienced that one of the most important components of IT is computer. The role of computer and digital equipment is well accepted in decision making, automation of work and in communication. Therefore, it has become essential for everyone irrespective of their core discipline to acquire basic knowledge and skills to develop insight not only into its potential and application but also to utilize and manage basic IT infrastructure and resources effectively.

A college campus recruitment system that consists of a student login, company login and an admin login. The project is beneficial for college students, various companies visiting the campus for recruitment and even the college placement officer. The software system allows the students to create their profiles and upload all their details including their qualification onto the system. The admin can check each student details. The system also consists of a company login where various companies can see which students apply for their company. The software system allows students to view a list of companies who have posted for vacancy. The system handles student as well as company data and efficiently displays all this data to respective sides.

Objective:

The main objective of the project on campus Recruitment system is to manage the details of company, student vacancy. It manages all the information about company, placement, student. The purpose of the project is to build an application program to reduce the manual work for managing the company, placement, student. It tracks all the details about the company, placement, student.

1.Reduce the paper work and create database for student, company etc.

2.User friendly Interface.

3.Save time and work load.

4.Only eligible students get chance.

1.2 Existing system and Problem

This recruitment process system is developed using CSS as front-end and SQL as back-end. This system provides customized screen and enhanced menu utilities. It is designed in a such way that it is friendly with the user. Thus the system provides effective , efficient, cost saving and time saving operations in a recruitment process system.

In an existing systems student cannot view companies details and cannot apply for the job. Student also cannot see which company is currently offer a placement.

1.3 Proposed System:

The aim of proposed system is to develop a system of improved facilities. The proposed system can overcome all the limitations of the existing system. The system provides proper security and reduces the manual work.

The project is beneficial for college students, various companies visiting the campus for recruitment and even the college placement officer. The software system allows the students to create their profiles and upload all their details including their qualification onto the system.

A campus recruitment system that consists of a student login, company login and an admin login.

Vacancy :

In student section student register and fill the form to apply for any company. Once the student is registered then he can simply login into the system to see which company is currently offer a job.

Companies:

In company section company register and fill the registration form. After registration they can simply login into the system to see which students apply for there company. Company also have facility to select those student which they want and only that list admin can provide to student.

Modules: • Home • About • Companies • Apply • Vacancy

- Security of data
- Ensure data accuracy's
- Better service

- Minimum time required
- Greater efficiency.
- Minimum time needed for the various processing

1.4 Advantages of proposed system:

1. There will be no need of putting up notice or emailing every student about the company coming in college. The student can updated themselves through this system.
2. The company can view all students detail and company can shortlist Students according to their criteria instead of doing manually**.**
3. Students can register online instead of going to placement department for registration.
4. This system saves time and efforts.
5. Reducing the size of advert in conventional print media: The print advert only needs limited information, directing application to the website to view a much richer range of information and the opportunity to apply online immediately.
6. Using web recruitment rather than print media or agencies. Offering considerable cost saving and extensive candidate reach for most roles.

Chapter 2- Literature survey for Problem Identification

2.1 Literature Survey

Author (Publication)	Abstract	Conclusion
Edwin B. Flippo	This paper explains the "Recruitment is the process of searching the candidates for employment and stimulating them to apply for jobs in the organization"	We used this paper to understand how to apply for a jobs without going to any ware.
Muzafer H. Saracevic (Technics Technologies Education Management)	This paper explains the latest Java Technology for Web Application Development which is Servlet.	We used this paper to understand which programming language to choose for application development.
Hana R. Esmael (IJARCSSE)	This paper explains the different tools Eclipse which is used to develop Web Applications.	We used this paper to understand the use and different tools of Eclipse.
Li Ma (IJMUE)	This paper explains the latest JSP technology for Web Application Development.	We used this paper to understand which programming language to choose for application development.

Table 2.1- Literature Survey

Chapter 3: Scope of the project

3.1 Scope of the project:

It may help collecting perfect management in details. In a very short time, the collection will be obvious, simple and sensible. It will help a person to know the management of passed year perfectly. It will be also reduced the cost of collecting the management and collection procedure will go on smoothly.

This system has a big scope to do. Students can maintain their information. Student can access the information about the recruitment. This project has a large scope as it has the following features which help in making it easy to use ,understand and modify it:

- No need to do paper work.
- Automation of Placement procedure.
- To save environment by using paper free work.
- Management of student data.
- To increase the accuracy and efficiency of placement procedure.
- The system generates types of information that can be used for various purpose.
- Be easy to operate
- Be easy to understand by the user and operator.
- Be expandable

3.2 Feasibility Study

Feasibility study includes consideration of all the possible ways to provide a solution to given problem. The proposed solution should satisfy all the student and company requirements and should be flexible enough so that future changes can be easily done based on the future upcoming requirements.

A. Economical Feasibility :

This is a very important aspect to be considered while developing a project. we decided the technology based on minimum possible cost factor.

- All hardware and software cost has to be borne by the organization.
- Overall we have estimated that the benefits the organization is going to receive from the proposed system will surely overcome the initial costs and the later on running cost for system.

B. Technical Feasibility:

This include the study of function, performance and constraints that may affect the ability to achieve an acceptable system. For this feasibility study, we studied complete functionality to be provided in the system, as described in the system requirement

specification and checked if everything was possible using different type of fronted and backend platforms.

1. HTML
2. CSS
3. JSP
4. Google Form

3.2.1 Resource and Time Feasibility:

Resources that are required for project includes:

1. Laptop

From this it's clear that the project has the required resource feasibility.

3.2.2 Risk Feasibility:

Risk feasibility can be discussed under several contexts,

1. Risk associated with size
   i. Estimated size of product in line of codes:
      As a web application the system contains significant amount of code. As the system does not contain any multimedia aspect, the file sizes and the complete project size is less than 200 MB.
   ii. Estimated size of product in number of programs:
      The entire system is developed as single web application. Depending on access rights, the contents will be showed or hidden.
   iii. Size of database created or used by the product:
      The database will not exceed the values supported by MySQL (65526 entries per table).
   iv. Users of product:
      a. Students

3.2.3 Social Feasibility:

Campus Recruitment System uses freely available development tools, and provide the system as an open source system. JSP Software libraries that are used in this system are free open source libraries. Since this new system eliminates the effort to make statistical distributions, it will have a great impact in a educational institutes.

3.3 Requirements specification:

- **Software requirement :**

Sr.no	Name of resources material	Specifications
1.	YouTube	MP4-file format, 640 x 360 pixels
2.	Language	Java 2 Runtime Environment, CSS
3.	Database	Google Form
4.	Browser	Google
8.	Operating system	Windows 10
9.	Laptop	Hp, RAM 8 GB, 1 TB Hard-disk, i5 processor

Table 3.3- Resources Required

- **Hardware requirement :**

Sr.no	Name of resources material	Specifications
1.	Processor	Intel i5 system
2.	Processor Speed	250MHz to 833 MHz
3.	RAM	512MB RAM
4.	Hard Disk	40GB

5.2 Modules

Register :

In register section student register and fill the form to apply for any company. Once the student is registered then he can see which company is currently offer a job.

Companies:

In companies section thouse company are that are register and patner with us. Company also have facility to select those student which they want.

About :

This section provide a information about the site. What type service company provide student.

Apply :

In Apply Section you can regiter yourself.

Vacancy :

In this module you can apply for job which is suitable for you.

<h2 style="text-align: center;">Job description</h2>
<p><b>Job Description</b></p>
<p>Looking for a Technical Recruiter to join our HR
department and help us grow our IT teams.</p>
<p>
Source, screen and provide a shortlisting of qualified
candidates for various technical roles.
```

Network online and offline with potential candidates to promote our employer brand, reduce our time-to-hire and ensure we attract the best professionals.
Build a strong tech talent pipeline and help hire and retain skilled employees for our IT positions.
Roles & Responsibilities

1. Source potential candidates on niche platforms, like Naukri & LinkedIn

2. Parse specialized skills and qualifications to screen IT resumes

3. Perform pre-screening calls to analyze applicants abilities

4. Coordinate with internal and external stakeholders to fulfill IT hiring needs

Skills Required

1. Proven work experience as a Technical Recruiter or Recruiter

2. Ability to understand and explain job requirements for IT roles

3. Solid knowledge of sourcing techniques (e.g. social media recruiting and Boolean search)

4. Excellent verbal and written communication skills

Experience

1. 6months -4 years of experience in technical recruitment is required

2. Immediate to 15 days joiners are preferred

        text-align: justify;">

<h2 style="text-align: center;">Job description</h2>
<p><b>Job Description</b></p>
<p>A day in the life of an Infoscion</p>
<p>
   1. As part of the Infosys consulting team, your primary role would be to actively aid the consulting team in different phases of the project including problem definition, effort estimation, diagnosis, solution generation and design and deployment

   <br> 2. You will explore the alternatives to the recommended solutions based on research that includes literature surveys, information available in public domains, vendor evaluation information, etc. and build POCs
```

3. You will create requirement specifications from the business needs, define the to-be-processes and detailed functional designs based on requirements.

4. You will support configuring solution requirements on the products; understand if any issues, diagnose the root-cause of such issues, seek clarifications, and then identify and shortlist solution alternatives

5. You will also contribute to unit-level and organizational initiatives with an objective of providing high quality value adding solutions to customers. If you think you fit right in to help our clients navigate their next in their digital transformation journey, this is the place for you!

Educational Requirements
Bachelor of Engineering, Master Of Engineering, BTech, MSc, MCA
Service Line
Enterprise Package Application Services
Additional Responsibilities:

• Ability to work with clients to identify business challenges and contribute to client deliverables by refining, analyzing, and structuring relevant data
• Awareness of latest technologies and trends
• Logical thinking and problem solving skills along with an ability to collaborate
• Ability to assess the current processes, identify improvement areas and suggest the technology solutions
• One or two industry domain knowledge
Technical and Professional Requirements:
• Primary skills: Supply Chain Management->IBM Sterling OMS, Supply Chain Management->IBM Sterling WMS

Skills Required
Supply Chain Management->IBM Sterling WMS
Experience

1. 2 years and above

6.3 Application

1. The project can be used for helping companies to get the best candidate.
2. The project can be used for company to get directly come in contact with the student.
3. The project can be used for student get to know about the jobs and the companies directly
4. The project can be used by student to get to know the company new placement offers.
5. The project can be used by admin to help the student to search company.

Chapter 7 Conclusion and Future Scope

7.1 Conclusion

In the existing placement system ,maximum work does manually and it takes time for any change in system. we conclude that Recruitment is one of the main departments which place the right candidates to the right job. The recruiters should identify the best candidates from different sources and job sites. Recruiters should identify the problems faced during recruitment and find an alternative to make work efficiently.

The Web Portal will be created by using JAVA and CSS language along with MYSQL database. The structure of portal will be as shown in above various UML Diagrams.

7.2 Future Scope

In proposed online placement system there is scope for improvement of the system. System is not provide the SMS integration. Hence, it can be modified to give the SMS integration. Apart from these there is scope for generating many more features. In the future we can place the system on the cloud so the maintenance of the data can be reduced. The Exam system will integrate with the online placement system so the student result can get directly. There can be many more future Enhancement And improvement in the online placement system.

- We can add printer in future.
- We can give more advance software for Campus Recruitment system including more facilities.
- We will host the platform on online servers to make it accessible worldwide
- Integrate multiple load balancers to distribute the loads of the system
- Create the master and slave database structure to reduce the overload of the database queries.
- We can add SMS and Email facility.
